DETAILED ACTION

Allowable Subject Matter

Claims 1-8 are allowed.

Claims 1-8 are allowable over the prior art of record for at least the reason that, even though the prior art discloses stoichiometric lithium niobate crystals doped *inter alia* with Mn, the prior art fails to teach or reasonably suggest, regarding claims 1-4, a two-color holographic recording medium comprising a lithium niobate crystal having substantially stoichiometric composition and doped with only Mn in the range from 1 wt ppm to 100 wt ppm, and regarding claims 5-8, a method for recording information on a two-color holographic recording medium, comprising the step of providing a two-color holographic recording medium comprising a lithium niobate crystal having substantially stoichiometric composition and doped with only Mn in the range from 1 wt ppm to 100 wt ppm, as set forth by the claimed combination.
